

CMxCONNECT THE FUTURE OF VIRTUAL HEALTH

CMxConnect is a fast and convenient way for your medical centre to connect your patients directly with your healthcare professionals through a secure, live video consultation, anytime, anywhere.

It is more than just telehealth, CMxConnect is an evolution of easy-to-use and instant, virtual care.

A DIGITAL TOOL EVERY MODERN AUSTRALIAN MEDICAL PRACTICE NEEDS

The innovative telehealth mobile app is designed to meet the

increasing requirement for access and convenience demanded by healthcare practitioners and patients, offering both standard and after-hours appointment services and on-demand requests.

Designed by an Australian medical practice, with day-to-day experience of managing a practice and health professionals, CMxConnect capitalises on Government policies and ensures video calling is as simple as possible.

It integrates with both Best Practice and HotDoc platforms, providing you and your practitioners with simple yet secure access to patient data, roster, and appointment schedules.

WHY CMxCONNECT?

It is **designed by our practice for your practice**. The Australian-made software is based on our own experience in our medical practices with patients, corporate clients, and Government policy.

Easy to sign up, simple to use, CMxConnect has **great support services to guide you should you need it.**

CMxConnect can be used as a mobile app **with any device, and web application across all major browsers** (Firefox, Safari, Chrome, Microsoft Edge).

Ease of use is guaranteed as patients don't have to wait on web page for a call from a doctor. CMxConnect allows the doctor to call the patient just like a phone call or Facetime™.

It securely connects patients of all ages with health professionals to **receive care when and where it is needed.**

It provides medical practices with the opportunity **to increase the number of appointment bookings and patients per day** as healthcare professionals can now provide telehealth consultations on-the-go at anytime from anywhere.

Data shows an increase in the **efficiency and effectiveness** of face-to-face video consultations, as opposed to just telehealth phone calls.

Your practice can offer after-hours **home doctor service** via video telehealth **on its own or as part of a national co-operative.**

Hosted locally, our system offers a **secure point to point service** with no third-party intervention. Your data and video consultations are secure with CMxConnect.

JOIN A CO-OPERATIVE

- Accredited practices can take advantage of a national co-op and provide 24/7 after-hours service to your patients, benefitting from Government incentives at minimal cost.
- This also helps to address some of the challenges facing Australia's healthcare system. It meets the real need in Australia for more access to affordable, accessible healthcare.
- It removes physical barriers and provides the greater community to have access to quality, affordable healthcare anytime, anywhere.

Our friendly team are here to help, if you have any queries, please contact our helpdesk team at info@clinimetrix.com.au

DOCTOR DASHBOARD

GPs can now have an at-a-glance overview of the upcoming telehealth appointments and call history via the CMxConnect dashboard. Best Practice has been integrated into CMxConnect, which means GPs can now view their Best Practice Schedule through the dashboard without switching between platforms.

ON-DEMAND SERVICE FOR YOUR PATIENTS

Medical practices can either opt to provide CMxConnect access to:

- Existing patients only or
- Both new and existing patients

Patients can either opt to:

- Download the app themselves and choose your medical practice, or
- Receive set-up assistance from your clinic where a patient's account can be set up by your staff. An account set-up email will be sent to the patient consisting of a patient ID, initial password, and a link to download the app and log in.

ON-DEMAND SERVICE FOR BUSINESS

On-demand injury management is a subscription-based service* which offers businesses and organisations access to your medical professionals in the moment it's required;

- Business account registration (Aged care, service providers, trades)
- Single account with multiple users (for non-existing patients).

WHO ARE OUR SUBSCRIPTION CLIENTS?

Subscription clients gain access to your medical practice and healthcare practitioners through a paid monthly subscription. Discover how CMxConnect can empower your medical practice.
